Course: CS-612-23279
Project-5

- Submit the zip file of a folder containing your solution folder “welcomeJSP” for your first JSP web application, and solution folder “welcomeServlet” for your first servlet web application, as illustrated in course tutorial Sections 6.3.6 and 6.3.7.

welcomeJSP

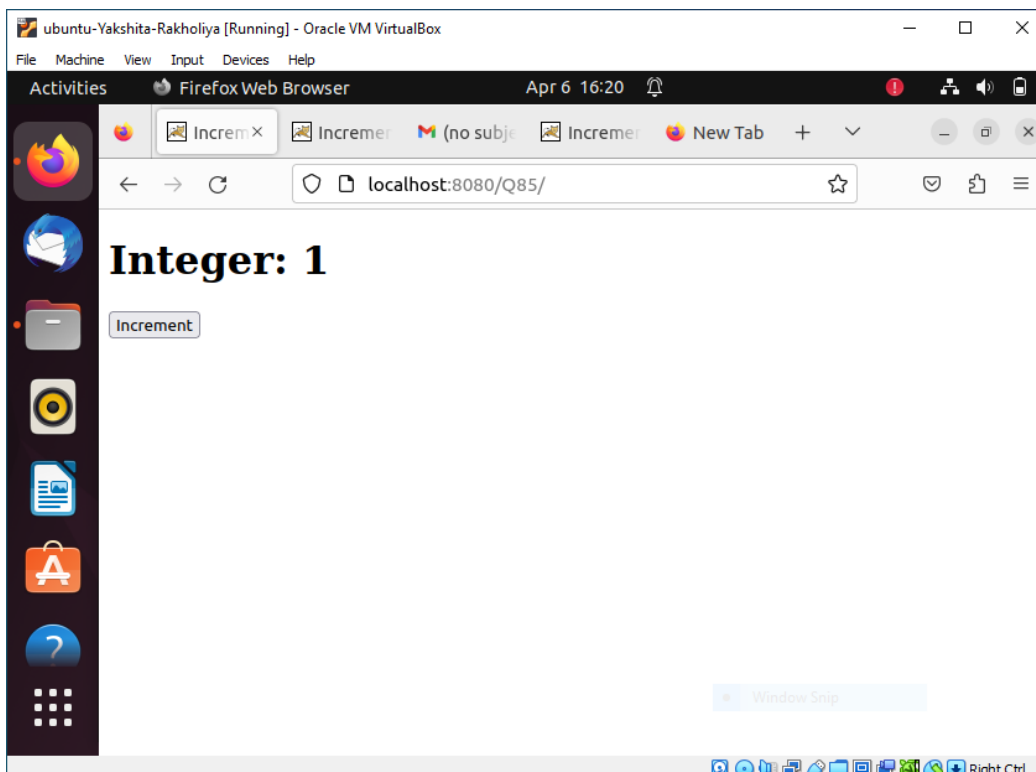

welcomeServlet

- Submit your answers to all review questions in this section on web technologies, and submit zipped folder of your solution folders to Questions 85 and 86 (JSP and Servlet projects for a web counter).

Question 85: Develop a JSP web application that displays in a web browser an integer and a submit button. The integer is initially 0. Each time the user clicks the button, the integer increases by 1.

Question 86: Develop a servlet web application that displays in a web browser an integer and a submit button. The integer is initially 0. Each time the user clicks the button, the integer increases by 1. [Hint: If you want a servlet to create the default welcome web page, use the servlet's "servlet-name" element value as the value of the "welcome-file" element in file "web.xml".]
